

Agriculture Research Station
Navsari Agricultural University
Tanchha-392025

Objectives

- To test and evaluate high yielding, early maturing, good grain quality, pest and disease resistant variety of wheat, sorghum and pulses.
- Development of new agro- technology for the different niche crops/ cropping systems.
- To identify an alternate crop/ cropping system under limited water availability.
- To develop proper irrigation method for optimum utilization of available water.
- Appropriate soil management including land configuration, use of organic amendment etc.
- To disseminate the information of new agro technology to farmer through extension activities.
